EDUCATION

Government College University
Bachelor of Science in Computer Science

Lahore, Pakistan
Sept. 2020 – June 2024

The Educators
FSC Pre Engineering

Lahore, Pakistan
Sept.2019 – June 2020

EXPERIENCE

Software Engineer Intern
Tech Bridge Consultancy

June 2023 – Sep 2023
Lahore, Pakistan

- Designed responsive, user-friendly interfaces using Angular, HTML, CSS, and JavaScript, delivering a modern and intuitive user experience.
- Built and maintained RESTful APIs and server side-logic in JavaScript, managing databases, authentication and server-side authentication.
- Utilized Git for version control, managed code repositories, and coordinated branching and merging code changes with team members.

Intern
Government College University

July 2022 – Oct 2022
Lahore, Pakistan

- I was hired by my university for a project called Campus Management System
- Students were assigned to create a project which was reviewed and shortlisted students were interviewed. I was selected amongst the top 30 students

PROJECTS

Travelling Salesman Problem using Branch and Bound / C++, DevC++

June 2022

Creation and Documentation of Branch and Bound technique to solve the travelling salesman problem

Blood Bank Management System | MySQL

June 2022

Developed a database for Blood Bank Management.

User Registration and Login Authentication API / Node.JS, MongoDB, Express, JavaScript

June 2023

Developed a server-side application that registers a user and allows him to login after being authenticated by JWT

Book Review Application / Node.JS, MongoDB, Express, JavaScript

Aug 2023

Developed a server-side application that allows students to retrieve books by various search methods.

The users are allowed to register too and once registered they get access to other modules such as adding, deleting or modifying a review

CRUD REST API / Node.JS, MongoDB, Express, JavaScript

June 2023

Developed a REST API to perform create, retrieve, update, delete operations on a database.
