OBJECTIVE

(Front-End Developer)

As a 7th-semester Bachelor of Computer Science student, my objective is to secure an internship position in a dynamic and innovative software company. I am eager to contribute my knowledge and passion for web development to a challenging working environment that fosters continuous learning and encourages professional growth. By collaborating with the company's team, I aim to leverage my skills and dedication to propel both myself and the organization forward in the software engineering industry.

PROJECTS

Amazon Clone using ReactJS. Create an Amazon clone project with a list of items that include cart capability, utilize React-Router to navigate between pages, and make it mobile friendly.[Link](#)

MyPortfolio using ReactJS. Detailed descriptions and live demos of the projects I've worked on. An overview of the technical skills and tools I've Learned. Easy way to get in touch with me directly through the site.[Link](#)

Tic Tac Toe using JavaScript. Created a classic Tic Tac Toe game using vanilla JavaScript, HTML, and CSS. The game includes features such player 1 vs. player 2, and a reset functionality. Employed JavaScript for game logic, DOM manipulation, and event handling to ensure smooth gameplay. This project demonstrated foundational skills in JavaScript programming and front-end development.[Link](#)

SKILLS

- HTML
- CSS
- JavaScript
- Bootstrap
- React.js

EXPERIENCE

Trainee Program Front-End at Programmer Force:

Developed skills in HTML, CSS, JavaScript, and Bootstrap for creating responsive web applications, and utilized Vue.js for building dynamic, interactive user interfaces, with a focus on front-end development best practices and performance optimization
