- React.js
- Flask
- Web scraping
- Langchain
- PHP Laravel

LANGUAGES

- ENGLISH
- URDU
- PUNJABI

ABOUT ME

Aspiring junior developer with hands-on experience in Django REST Framework (DRF) and React. I am passionate about building scalable web applications, testing backend systems, and creating user-friendly interfaces. Eager to contribute to your team, I bring a strong foundation in web development and a commitment to continuous learning and growth. Excited to collaborate on innovative projects and further develop my skills.

WORK EXPERIENCE

Django & React.js Fullstack Internship   2024

Code Genesis Lahore

- Django REST Framework (DRF) Backend: Developed and managed APIs, handled user authentication, and worked with complex data models.
- Backend Testing: Conducted comprehensive testing to ensure the reliability and performance of the backend.
- React Frontend: Created dynamic user interfaces, implemented state management, and enhanced user experience with React.

PROJECTS AND CERTIFICATIONS

Showcasing a diverse portfolio of projects on GitHub, I've applied my skills in Python, Django/DRF,, React, Flask, Laravel, and generative AI to create innovative solutions. These projects, undertaken during my internships and studies, reflect my commitment to continuous learning and practical application, complemented by certifications earned online.
