– Our project is based on tourism. On our website, users can browse and book hotels, transportation, tour packages, and tour guides, as well as buy products related form famous tourist attractions.

PROJECTS

Heat loss Calculator   Link to Demo

In the heat loss calculator project, users will be able to select their country, state, and city. They can then input the distances for each area of their home and select the type of marble used in their floors. The calculator will then compute the heat loss

Emotion Dectection System   Link to Demo

In this Project User will stand in front of camera and then it will show your emotion in real time

EDUCATION

2020 - 2024 Bachelor's Degree in Software Engineering at **Comsats University Islamabad**
